Vision and Hearing Screening

The Door County Public Health Department offers free Vision and Hearing Screenings as part of their services to the public. The purpose of the screenings is to identify students with potential vision and hearing deficits in order to facilitate early intervention, which may be beneficial to the student. The Door County Public Health Department offers Puretone audiometric hearing screening for Pre-Kindergarten through Fifth grade. The Door County Public Health Department also offers, in collaboration with the Lions Clubs of Door County, vision screening to Pre-Kindergarten through Fifth grade and also Seventh grade. Students outside these grades can be referred for screening by school staff or parents/guardians who identify areas of vision concerns. Screening for stereopsis is also done on all children screened.

The Door County Public Health Department offers the vision and hearing screening every year to all Public and Parochial Schools in Door County. In addition anyone who feels their child needs to be tested before entering school (3 yrs. youngest age tested) may make an appointment to be seen at the Door County Health Department. We also provide this service to all county employees and businesses.
